

CSRD in Practice - Approaching obligations pragmatically

As we enter 2025, the Corporate Sustainability Reporting Directive (CSRD) is posing new challenges for companies. A number of companies are preparing for mandatory sustainability reports ("ESG reports") for the year 2025. What steps are being taken by companies to ensure compliance with these requirements? How can we avoid unnecessary administrative burdens and approach reporting efficiently?

Key topics of the webinar

- How are Slovak companies preparing for CSRD in 2025?
- A practical approach to fulfilling CSRD requirements
- Digital solutions for efficient data collection and management
- What to expect from ESG report audits?
